

Why a Medical Assessment?

For your safety and the safety of others, you are required to undergo a medical assessment:

- following certain changes in your state of health;
- at age 80 and every two years thereafter.

Depending on the state of your health, these checkups could be required more frequently.

What do you need to do?

① Undergo a medical assessment

Consult a physician or a specialized nurse practitioner to have the *Report on a Person's State of Health – Driver's Licence* that you received filled out. Note that you will usually have to pay a fee for this service.

② Send us the report

Send us the report by the prescribed deadline for your driver's licence to remain valid.

③ Wait for the decision

After our analysis, a decision will be rendered and sent to you in writing. In the meantime, your driver's licence will remain valid.

Rest assured, very few drivers have their licence withdrawn after a medical assessment. However, some may be subject to certain conditions, such as having to wear glasses when driving.
